Experience

Frontend Developer

Jan 2025 – Present

Matlab Infotech, Surat

Collaborating with UX designers and backend developers in an Agile environment to ensure alignment of web design, user experience, and brand consistency.

CrickEdge – Real-Time Cricket Commentary Platform

- Developed real-time features using React.js and React Hooks, ensuring **user experience determines design choices** for live data updates.
- Optimized web pages for maximum speed and scalability**, improving Lighthouse performance score from 62 to 91 and cutting initial load time by 40% via lazy loading and code splitting.
- Built **reusable code** and component-driven architecture for future use across the platform, maintaining strict brand consistency.
- Wrote unit and integration tests using Jest to ensure robust, problem-free deployments in close collaboration with backend teams.

MoveWork – Enterprise Job Marketplace

- Translated Figma designs into highly **responsive and adaptive** web interfaces, ensuring **web design is optimized for smartphones** and all devices.
- Maintained **brand consistency throughout the design** by implementing a centralized UI component library.
- Applied **SEO principles** through semantic HTML, proper heading structures, and optimized meta tags to enhance search visibility.
- Integrated REST APIs for authentication and user management, utilizing Context API for seamless global state management.

Hobson – Property Management Platform

- Developed an AI-powered chat interface, striking a balance between **functional and aesthetic design**.
- Managed complex nested dataset state using Redux for predictable data flow, demonstrating strong **problem-solving skills**.
- Integrated asynchronous document extraction APIs using efficient polling mechanisms.

Appinvento – AI Agentic Chat Interface

- Built an AI agentic chat interface rendering streaming responses, utilizing modern React features and server-side CSS (Tailwind).
- Integrated Monaco Editor to display and preview code/file contents directly within the chat interface.

Projects

Pinterest Clone (Full Stack Major Project)

[GitHub](#)

- Architected a full-stack web application utilizing **HTML, CSS, JavaScript**, React.js, Node.js, Express, and MongoDB.
- Designed and integrated REST APIs for user authentication, pin creation, and dynamic feed generation.
- Ensured **responsive and adaptive design** principles were applied, providing a seamless experience across mobile and desktop viewports.

Spotify Clone (Minor Project)

[GitHub](#)

- Developed a fully **responsive** music player interface using core **HTML5, CSS3, and JavaScript**, ensuring optimal display on **smartphones**.
- Struck a balance between functional and aesthetic design, maintaining brand consistency with the original Spotify UI.
- Implemented audio playback controls and dynamic DOM manipulation for a smooth, interactive user experience.

CLI Todo App

[GitHub](#)

- Built a command-line task management application using Node.js, demonstrating strong asynchronous JavaScript problem-solving skills.

Skills

Languages:	HTML5, CSS3, JavaScript (ES6+), TypeScript, jQuery
Frontend:	React.js, Next.js, Redux, Context API, React Hooks, Tailwind CSS, Server-side CSS
Backend:	Node.js, Express.js, MongoDB, REST APIs
Design & UX:	Responsive & Adaptive Design, Figma, Adobe Illustrator (Familiar), Brand Consistency
Testing:	Jest, React Testing Library
Concepts:	SEO Principles, Performance Optimization, Scalability, Reusable Code Architecture
Soft Skills:	Excellent Verbal Communication, Cross-functional Collaboration, Problem-Solving, Agile Methodologies

Education

Bachelor of Engineering (Computer Engineering)	2021 – 2025
Shree Swami Atmanand Saraswati Institute of Technology	
CGPA: 8.49 (Matches requirement: Degree in computer science or related field)	

Certifications

• Code Unnati Program	2023 – 2024
CSR initiative by SAP and Edunet Foundation focused on industry-oriented software development, problem-solving, and employability skills.
